Cont'd

3. (Currently amended) The method of claim 2 further comprising:

sending, from the client computer, to the a certain merchant an identification of the other merchant and the other item; and

receiving a notification that the previous committed transaction with the other merchant is canceled.

4. (Previously amended) The method of claim 2 wherein the selected associated state causes an indication to be sent from the client computer to the certain merchant to lock specific data associated with the desired item from being accessible by a different client computer during a period that an associated representation for the desired item has the selected associated state.

5. (Original) The method of claim 3 further comprising changing the selected state to a different state, upon notification of the cancellation, wherein the different state provides an indication of one of the following: a) the buyer desires to put the desired item on hold for a time to consider buying the desired item, and b) the buyer has bought the desired item.

10. (Currently amended) The system of claim 9 further comprising:  
means for sending, from the client computer, to the certain merchant an identification of the other merchant and the other item; and  
means for receiving a notification that the previous committed transaction with the other merchant is canceled.

11. (Previously amended) The system of claim 9 wherein the selected associated state causes an indication to be sent from the client computer to the certain merchant to lock specific data associated with the desired item from being accessible by a different client computer during a period that an associated representation for the desired item has the selected associated state.

12. (Original) The system of claim 10 further comprising means for changing the selected state to a different state, upon notification of the cancellation, wherein the different state provides an indication of one of the following: a) the buyer desires to put the desired item on hold for a time to consider buying the desired item, and b) the buyer has bought the desired item.

13. (Currently amended) A computer program having computer readable program code means, on a computer usable medium, for enabling a client computer system to communicate over a network with at least one server computer system to carry out electronic transactions for a buyer using the client computer system to purchase items from a plurality of merchants using the at least one server computer system, the program comprising:

AUS990886US1
